

KI•LINE The system has its own bus system for communication between MCPU and Car CPU, as well as for the landing call loop and the destination buttons.

From the MCPU utgår:

- Two 4-wire bus for the call communication , max 64 ea. landing call card.
- One 2-wire bus for car communication.
- From the Car-CPU utgår:
- En 4-trådsbuss för destinationer (max 16 I/O kort, 128 in/128 ut).

Utöver detta finns det följande buss anslutningar:

- Two CAN Bus anslutningar on the MCPU for gruppstyrning and externa enheter.
- One CAN Bus anslutning on the Car-CPU för externa enheter.
